## Optimised Warehouse Storage Solutions

Choosing the right racking system for your warehouse operation is critical to your daily business work-flow.

### Colby RackMan Certification

Our proprietary software tool, RackMan, is the ColbyRACK product performance badge of excellence. By using RackMan we can guarantee the load capacity and strength of your ColbyRACK system, protecting your staff and products, and offering you total peace of mind.

# Which Rack?

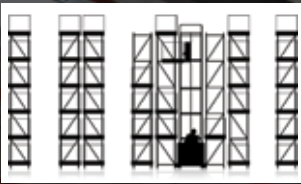

## **SELECTIVE**

The most common form of racking, used typically for a wide range of SKUs with minimal stock and immediate access to all pallets.

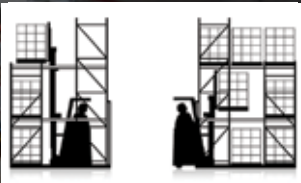

## **DOUBLE-DEEP**

With a double-deep, double-sided configuration, density and selectivity are achieved. Forklifts require a pantograph mechanism.

## **NARROW AISLE**

Conventional selective pallet racking configured with narrower aisles, which is used with a specially designed turret truck.

## **DRIVE-IN**

Drive-in racking is the lowest cost solution for high density pallet storage. Designed for large quantities of the same SKU.

## **PUSH-BACK**

Provides high density storage where pallets are stored 2, 3 or 4 deep. As a pallet is removed, the ones behind slide forward.

## **SATELLITE - RapidRunner Carts**

Semi-automated satellite carts run up and down lanes to retrieve (or store) pallets.

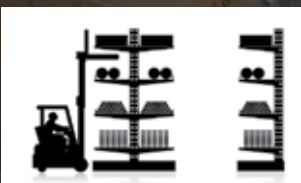

## **MOBILE**

Mounted onto electrically powered mobile bases, mobile rack only opens aisles as required, achieving very high storage density.

## **PALLET LIVE STORAGE (PLS)**

Pallets are loaded into the rear and gently roll forward on rollers to the front position, providing first in, first out stock rotation.

## **CANTILEVER**

Ideal for horizontal storage of long, oversized and irregular materials such as steel, timber, sheets, pipes crates and furniture.

# CAPABILITIES OVERVIEW

Warehouse and office  
fit-outs – all trades,  
all services,  
...one expert provider.

**PALLET RACKING  
& SHELVING**

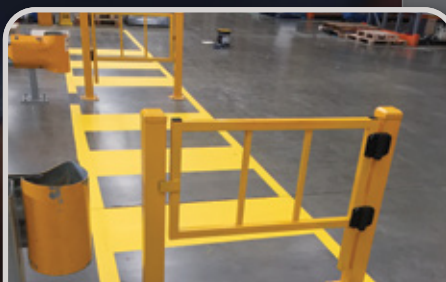

**RACK SAFETY  
INSPECTIONS & REPAIRS**

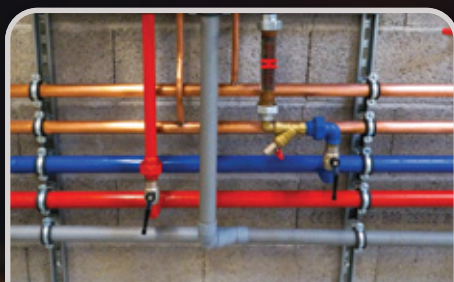

**ROLLER DOORS  
& FIRE DOORS**

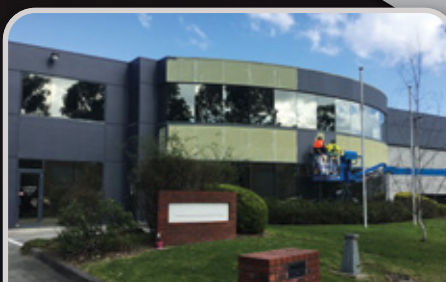

**ELECTRICAL  
& DATA SERVICES**

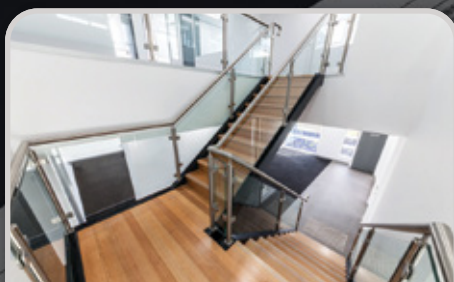

**SAFETY BARRIERS, BOLLARDS  
& LINE MARKING**

**PLUMBING  
& FIRE SERVICES**

**EXTERIOR FACADE  
REFURBISHMENTS / REFACING**

**STAIRS & BALUSTRADES**

EPOXY SEAL & POLISHING**

**OFFICE PARTITIONS  
(inc. GLAZING)**

**SUSPENDED CEILING  
& LED LIGHTING**

**FLOORING  
(inc. CARPETS & TILING)**

## Mezzanine Raised Storage Areas

Double or triple your available work area using a mezzanine raised storage area and get more space for your rental dollar.

**MANUFACTURED  
IN AUSTRALIA**

**DESIGNED TO AUSTRALIAN  
STANDARDS**

The most common form of racking, used typically for a wide range of SKUs with minimal stock and immediate access to all pallets.

Our comprehensive warehouse shelving range includes Carton Live Storage, Steel Shelving, Long-span Shelving and Heavy-duty Shelving.

Raised Storage Areas are cost-effective mezzanine solution that can double the usable floor area in your factory or distribution centre.

Whether a Belt Conveyor, Roller Conveyor or Gravity Roller Conveyor, conveyors can reduce or eliminate re-handling before and after each process, and can even be loaded and unloaded automatically.

Protecting your assets and staff should be paramount for any business. Designed to be fitted to almost all racking types, Colby Protect-a-RACK outperforms traditional steel and plastic protection.

Our service team inspects and repairs damaged racking, including emergencies.

## Our Services

- Warehouse Optimisation
- Racking and Shelving
- Mezzanine Raised Storage Floors
- Conveyor Systems
- Racking Protection
- Racking Inspections and Repairs
